

UK Board of
Healthcare Chaplaincy

Healthcare Chaplaincy
Bands and Duties Framework
(Revised 2015)

Introduction

As Healthcare Chaplaincy progresses towards voluntary registration as a healthcare profession with the Professional Standards Authority there was a need to clarify the professional framework for healthcare chaplaincy and to simplify the plethora of chaplaincy titles in use across the UK. There was also a clear need to define chaplaincy Bands and Duties in a language and framework that employers could understand. The UKBHC hosted a consultation day and sought the advice of the experienced lay members of the Board from other professions.

The role descriptors contained in this framework have been created to define the capabilities and competences and scope of chaplaincy practice that are deemed appropriate for roles within the healthcare chaplaincy profession. The indicative Bands have been given in accordance with the NHS Agenda for Change job evaluation framework.

This document should therefore be read in conjunction with the following document:

- [UKBHC Spiritual and religious Care Capabilities and Competences for Healthcare Chaplains \(2015b\)](#)

Notes:

Chaplaincy Support: The Board recognises that within the titles of chaplaincy support there may be considerable variation. For example voluntary visitors who visit all patients and those who may only visit those of a particular faith community or belief group. The details of each person's role should be clearly identified and noted in their contract with the employer.

Faith Community or Belief Group (Humanist) Representative: On the advice of the advisors to the board the title Chaplain in the healthcare context is reserved for those who work and meet the capabilities and competences at Band 5 or above of the UKBHC Capabilities and Competences for Healthcare Chaplains (2015b). There may be occasions where Chaplains are appointed to meet the needs of a particular faith community; however, these chaplains should be working at Band 5 or above and meet the relevant capabilities and competences for the post. For example: In Northern Ireland many chaplains are appointed as chaplains to the trusts from particular faith communities. To avoid doubt these posts are Chaplaincy posts.
